

Health Risk Assessment (HRA)

Establish health baselines with simple, satisfying tools

Sensely HRA is an easy-to-use conversational AI application that meets all the HRA needs of the innovative insurer. Leveraging the power of visual interfaces and a friendly virtual assistant, you now have a powerful new collaborator.

ALWAYS ON 24/7 HRA SERVICE

Convert workflow to a fully digital process that is more interactive than a digital form.

Enhance member experience

Receive more accurate member disclosure

Improve underwriting quality

STREAMLINED DISCOVERY & IMPLEMENTATION PROCESS

Sensely will conduct a workshop to better understand your specific process and assessment templates.

Build and test a demo

Explore with your stakeholder base

Refine conversational templates

In as little as one month, you have a new workflow to augment your current assessment strategy.

UNMATCHED VERSATILITY AND FLEXIBILITY

Take a look at a sample assessment **here**. A wide variety of questions and input types can be utilized for intuitive information capture. Advanced algorithmic decision logic is combined with a clean, empathic interface to drive superior completion rates.
